

TruthForge

The Verifiable Intelligence Layer for Global Trade

"Clearance at the Speed of Data"

THE BUILDER

Built by a Merchant, for the Global Market

Anietie John

CEO & Founder

AI-TECH HAVEN INTERNATIONAL

CAC: 9255386

- ✓ **Real-World Traction**
TruthForge isn't a "demo"—it's **live-synced** with my e-commerce store, www.a-thi.online. Every day, I experience the delays and fraud that cost merchants billions.
- ♥ **The Problem is Personal**
Small merchants lose weeks to port clearance. Carriers struggle with document fraud. **I built the solution I needed.**

🔑 Live Production System

🔧 Backend

Railway (live API)

🌐 Frontend

Vercel deployment

🤖 5 HOL Agents

Dedicated HCS topics

🔌 Integrations

FedEx API + WooCommerce

🛒 Live Merchant Portal

THE CRISIS

The \$1 Trillion Friction Gap

Global trade is bleeding efficiency—and AI-powered fraud is making it worse.

The Friction

Ports verify documents **only after** vessels arrive. Merchants and carriers submit paperwork; ports clear it days later—while cargo sits idle.

5–7 Days of Idle Waste

Per container, per port, every single shipment

The Threat

AI-generated fake bills of lading and cargo images are outpacing manual verification. Carriers like FedEx are ready for change—the infrastructure just didn't exist.

"FedEx joins Hedera to help securely verify shared shipment data across organizations and borders."

— Hedera Council Announcement, February 2026

The Cost

\$1 Trillion

Annually in Lost Efficiency

Demurrage fees, idle cargo, delayed supply chains

Source: World Bank, 2026

\$55 Billion

Lost to Document Fraud

Deepfake cargo photos, forged bills of lading

Source: Insurance Fraud Bureau, 2026

Until Now.

TruthForge changes everything.

OUR SOLUTION

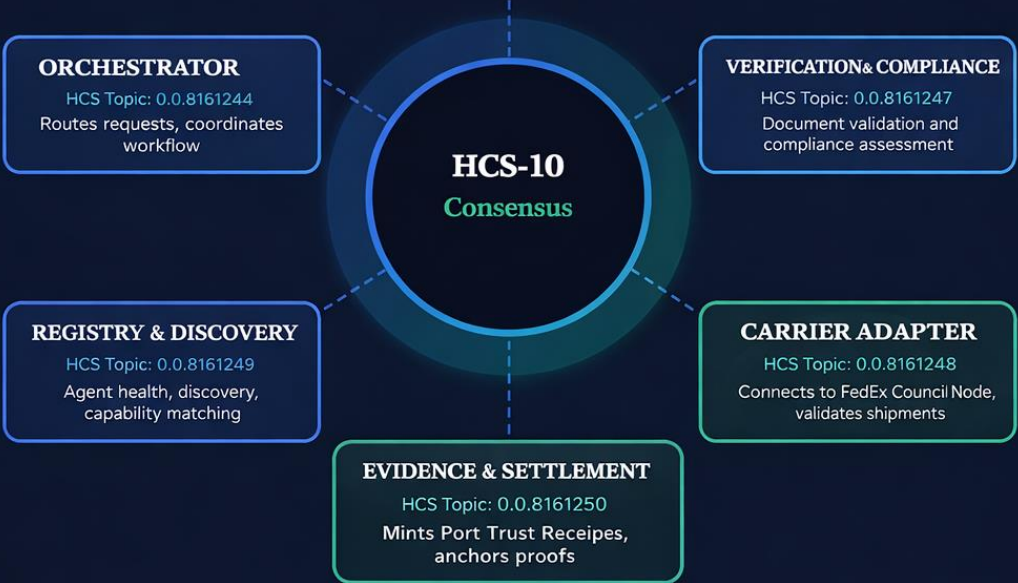

Autonomous Verifiable Intelligence

5 specialized AI agents working in concert—each HOL-registered with dedicated HCS topics.

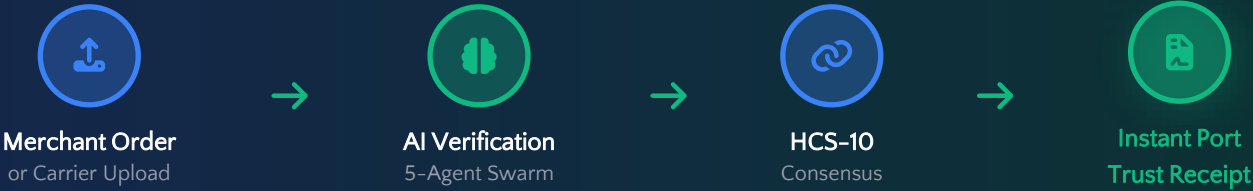

The 5-Agent Swarm Architecture

The Swarm: 5 specialized AI agents, each HOL-registered with dedicated HCS topics:

Agent	Role	Role	HCS Topic
Orchestrator	ORCHESTRATOR	Routes requests, coordinates workflow	0.0.8161244
Verification	Verification & Compliance	Document validation and compliance assessment	0.0.8161247
Carrier Adapter	CARRIER ADAPTER	Connects to FedEx Council Node, validates shipments	0.0.8161248
Registry & Discovery	REGISTRY & DISCOVERY	Agent health, discovery, capability matching	0.0.8161249

The Process

Agent Capabilities

- Orchestrator Agent**
Routes requests, coordinates multi-agent workflow, manages task distribution
- Verification & Compliance**
Document validation, compliance assessment, deepfake detection
- Carrier Adapter**
FedEx Council Node integration, shipment validation, API normalization
- Registry & Discovery**
Agent health monitoring, service discovery, capability matching
- Evidence & Settlement**
Port Trust Receipt minting, proof anchoring, reputation logging

The Result: Clearance moves at the **Speed of Data**, not the speed of paper.

Clearance at the Speed of Data

Dual-Entry Architecture: One Swarm, Two Entry Points

Path A: Merchant-Triggered

The SME Model

- 1 Source: **www.a-thi.online (WooCommerce)**
Live e-commerce platform generating real orders
- 2 Trigger: **Customer Order → Webhook**
Automatic webhook to Orchestrator agent
- 3 Flow: **Merchant → Carrier → 5-Agent Swarm**
Data sync with FedEx → AI verification → HCS consensus

★ Value: Instant pre-clearance for small businesses. Every merchant order gets its own HCS timestamp.

Path B: Carrier-Triggered

The Enterprise Model

- 1 Source: **Carrier Portal**
FedEx, Maersk, MSC, DHL, UPS integration ready
- 2 Trigger: **Bulk Manifest / AWB Upload**
Direct API upload to TruthForge
- 3 Flow: **Carrier → 5-Agent Swarm → HBAR Payment**
Automated verification with Hedera fee payment

★ Value: High-volume automated clearance for global logistics giants.

The Core: 5-Agent Swarm

Orchestrator

Receives data from both paths, assigns tasks

Verification & Compliance

Verifies cargo photos, detects deepfakes, validates AWBs

Carrier Adapter

Carrier data ingestion and normalization

Registry & Discovery

Agent discovery, health reporting, registry sync

Evidence & Settlement

Logs reputation, mints HCS proofs, generates receipts

The Scale

Daily e-commerce packages	165M
Annual shipping containers	220M

Each gets its own **dedicated HCS topic and timestamp**. Building the world's largest auditable trade ledger.

Beyond "Blockchain" — Real Utility on Hedera

Live on Testnet. Real transactions. Real consensus. Real value.

HCS-10 Protocol

Secure, multi-agent communication anchored to Hedera Consensus. Every agent message is **ordered, timestamped, and immutable**.

- ✓ Consensus timestamps in seconds
- ✓ Immutable message ordering
- ✓ Mirror node accessibility

HTS Minting

Creating **Verifiable Shipment Tokens (VSTs)** for every cleared container—digital passports that carry verification history across the supply chain.

Transparency

Port Authorities verify proofs instantly via Mirror Nodes. Customs can audit any shipment's journey with **complete traceability**.

Live on Testnet

Hedera Account	0.0.7974354
Main HCS Topic	0.0.8109600

5 Dedicated Agent Topics:

0.0.8161244	0.0.8161247
0.0.8161248	0.0.8161249
0.0.8161250	

 [View live on HashScan](#)

The Vision

Every shipment, from a single e-commerce package to a full container vessel, gets its own HCS record.

385 Million+

Annual Trade Events

Timestamped, auditable, and verifiable forever on Hedera

The Future FedEx Envisioned

Delivered Today

“ FedEx's Vision

"FedEx brings deep operational expertise to help advance trusted digital infrastructure for global shipments. This will help **securely verify shared shipment data** across organizations and borders, **reducing friction** in cross-border commerce."

 @hedera, February 13, 2026

What Dale Chrystie Said

"Clearance at the speed of data."

— Dale Chrystie

FedEx Business Fellow & Blockchain Strategist

 We Built It.

TruthForge Delivers

- ✓ **Securely verifies shared shipment data**
Across merchants, carriers, and ports in real-time
- ✓ **Reduces friction from 5–7 days to instant**
Pre-clearance at the speed of data, not paper
- ✓ **Council-Grade Carrier Adapter**
Connects directly to FedEx API and Hedera node

FedEx

+

Hedera

TruthForge bridges the gap between FedEx's vision and Hedera's infrastructure—**today**.

TRACTION

Production-Ready. Live Today.

This isn't a prototype. This is a live system processing real orders.

Live Deployments

Backend

Railway (Python 3.11, PostgreSQL, live API)

Frontend

Vercel (React, HashPack wallet)

Database

Supabase PostgreSQL (live)

Agents

5 HOL-registered with HCS topics

Live Integrations

WooCommerce

Real orders from www.a-thi.online trigger webhooks

FedEx API

Sandbox integration with real OAuth2 token flow

HashPack Wallet

Users connect, pay HBAR fees, receive receipts

Real Proof

5 HOL-Registered Agents

With UIDs and dedicated HCS topics

Live HashScan Links

Every verification has traceable proof

Port Trust Receipts

With scannable QR codes for verification

We didn't build a mockup.

We built a system.

The Operating System for Global Logistics

From pilot to global standard—our path to billions of verified trade events.

Q3

2026

Foundation & Pilot

- ✓ **Live Pilot with Port Authority:** First port integrates TruthForge for pre-clearance
- ✓ **Launch HTS Merchant Trust Tokens:** Reputation tokens for verified merchants
- ✓ **Add UPS, DHL, Maersk Adapters:** Multi-carrier support expands

Q4

2026

Scale & Intelligence

- ✓ **Predictive Return Fraud Scoring:** AI flags fraudulent returns before they ship
- ✓ **Dynamic Port Congestion Dashboard:** Real-time clearance time forecasts
- ✓ **HCS Topic per Order:** Scaling to 165M daily e-commerce packages

Q1

2027

Ecosystem & API

- ✓ **AI Carbon Clearance Fast-Lanes:** Verified green shipments get priority clearance
- ✓ **Merchant Trust Score Tokenization:** HTS-based reputation system
- ✓ **Full API Launch:** Third-party logistics platforms integrate TruthForge

Q2-Q3

2027

Global Expansion

- ✓ **First Global Trade Prediction Market:** Bet on shipment delays, clearance times, fraud outcomes
- ✓ **FedEx Production Integration:** Move from sandbox to live FedEx API
- ✓ **Global Port Expansion:** 5+ major ports adopt TruthForge pre-clearance

The Opportunity: Every container, every package, every merchant order will carry its own HCS proof. That's **billions of annual trade events**—each timestamped, auditable, and verified on Hedera.

Forge the Future of Trade

with Us

Hedera Council Partners

Pilot TruthForge at your ports

Carrier Collaborators

FedEx, Maersk, MSC integration
